

Music Machine 10 v2

Music Machine 10 v2 repeats an 8 bar section of the piano part from [Over the Airwaves](#) (a piece I wrote for the Belshaw Band).

There are 6 options for the process of repeats:

- 1) slow down speed 1 (slow) - increases the delay between each chord by 6.25% on every repeat of the 8 bars.
- 2) slow down speed 2 (medium) - increases the delay between each chord by 12.5% on every repeat of the 8 bars.
- 3) slow down speed 3 (fast) - increases the delay between each chord by 25% on every repeat of the 8 bars.
- 4) interrupted slow down - increases the delay as in option 3, but there is a 20% chance that the delay will be shortened by 25% instead of lengthened.
- 5) slow and restart - increases the delay by 25% but there is a 20% chance that the delay will be reset to its original value (0.25 seconds).
- 6) slow down bar by bar - there is a 20% chance that the delay will increase by 25% from bar to bar rather than over the whole 8 bars as a whole.

The machine will run indefinitely until stopped by the user.
